I am a statistician and data analyst candidate who is constantly learning, aims to realize himself, is both realistic and idealistic.

I plan to work in the treasury, inspection, and analytics departments throughout my career. I gained digital marketing experience in my own

venture for 3 years. While optimizing the sales performance of my business, I realized my passion for statistics and data analysis. I have a

perfectionist, self-confident and entrepreneurial nature. I can achieve good results in process management in a subject that was taught to

me. It can be said that I am quite determined to complete the tasks and increase the success rate.
